

COMPANY PROFILE

Ira Sustainable Water Solutions ©2017

YOUR PARTNER

IN CONSERVING WATER

ABOUT US

Ira started with an aim to make water available through water conservation.

Ira Sustainable Water Solutions is a leading professional services company in water conservation, helping industries, institutions and individuals conserve water. Our unique consultative approach helps clients envision and achieve their water goals.

Based in Pune since 2012 Ira is working with clients all over India. With over 130 Rainwater Harvesting projects completed Ira has been a catalyst in replenishing groundwater and improving ground water table in Western Maharashtra and Goa.

MISSION

Nation Building by creating a water-prosperous society through Water Management techniques

RAINWATER HARVESTING

RWH is not one-size-fits-all. We provide tailor-made solutions to industries, institutions and individuals as suited to their water need.

WATER SAVING AERATORS

Imported product that fits into existing taps and adjusts the stream of the water to save up to 80% water. It reduces the flow, regulates the pressure and doesn't affect your water usage experience.

RAINWATER FILTERS

A range of bespoke rainwater harvesting filters that reduce amount of excavation, make retrofitting easier and are approved by most state government bodies.

GROUNDWATER MAPPING

We conduct Geological, Hydrogeological and Geophysical investigation primarily to identify the strata beneath ground level for optimal groundwater-recharge at right locations and right depths

We provide a detail technical report and a map locating the water exploration points and recharge points.

WATER SAMPLE TESTING

Sample collection from site. Water tested for various parameters depending on type of water sample and application of water sample. Water sample tested from NABL Accredited and ISO Certified Lab on subscription or one-off basis.

CONSERVE WATER
BECAUSE IT IS THE RIGHT THING TO DO –
FOR YOU AND FOR THE ENVIRONMENT

CLIENT TESTIMONIALS

DON'T TAKE OUR WORD FOR IT, SEE WHAT OUR CUSTOMERS ARE SAYING

TESTIMONIALS

INDUSTRIES AND CORPORATES

Ira is our Trusted Water Partner. Ira has helped us with Rainwater Harvesting, Water Saving Aerators, Water Sample Testing, NOC for Groundwater Recharge and more...

- MD, Fleetguard Filtrum

We received a very professional service from Ira for rainwater harvesting system. It has made us green and sustainable.

- Director, Dynamic Prestress

Ira Team pushed through the RWH installation with full force. The best part about the system is no one can tell where is the system installed since they restored the site like it was before.

- General Manager, Thermax House

RESIDENTIAL AND INSTITUTIONAL PROJECTS

After Ira installed Rainwater Harvesting in our society, our borewells started yielding more water even during summers, which has reduced our tanker demand.

- Chairperson, Clarion Park CHS

We don't buy tanker water anymore, it could not have been possible without Ira's help. We highly recommend Ira's Rainwater Harvesting practices.

- Resident, DB's Diamond

We build green homes and Ira makes our projects sustainable on water front.

- Director, AV Bhat Group

I'm conserving water with RWH, saving water with aerators, saving energy since motor runs shorter time, I'm getting tax subsidy from corporation. I feel like a responsible citizen.

- Owner, Al Ameen Society

We are very impressed with Ira's Service Quality, Speed and Commitment. They finished the rainwater harvesting work during peak monsoons.

- Chief Engineer, Jehangir Hospital
